Sponsors and Committees xii
In Memoriam xiii

Section I. Microbeam facilities

The nuclear microprobe: a unique instrument
F. Watt 1
A history of ion microbeams
G.J.F. Legge 9
The new nuclear reaction analysis facility at the Lund Nuclear Microprobe
K.A. Sjöland, P. Kristiansson, M. Elfman, K.G. Malmqvist, J. Pallon, R.J. Utui and C. Yang 20
The Legnaro ion microprobe in low current experiments
F. Cervellera, C. Donolato, G.P. Egeni, G. Fortuna, R. Nipoti, P. Polesello, P. Rossi, V. Rudello, E. Vittone and M. Viviani 25
The novel ultrastable HVEE 3.5 MV Singletron™ accelerator for nanoprobe applications
D.J.W. Mous, R.G. Haitsma, T. Butz, R.-H. Flagmeyer, D. Lehmann and J. Vogt 31
The Schonland Micro-Scanning Ion Beam Analysis Facility
A.H. Andeweg, S. Ballestrero, J.U.M. Beer, J.E. Butler, M.B.H. Breese, S.H. Connell, L. Dini, B.P. Doyle, M.L. Drummond, P. Formenti, R.J. Hart, I.Z. Machi, R.D. Maclear, I.D. McQueen, P. Schaaff, E. Sideras-Haddad, J.P.F. Sellschop and G. Wernick 37
The nuclear microprobe at the University of Arizona
L.C. McIntyre Jr., J.A. Leavitt, M.D. Ashbaugh, J. Borgardt, R.L. Keith, A.J. Gandolfi, Q. Li, J.R. Lott and Q. Fernando 45
Design of the new superconducting microprobe system in Munich
G. Hinderer, G. Dollinger, G. Datzmann and H.J. Körner 51

Section II. Microbeam lenses and optics

Layout of a nuclear microprobe beamline using a liquid metal ion source
J. Adamczewsky, D. Löffelmacher, J. Meijer, A. Stephan, H.H. Bukow and C. Rolfs 57
Optimal magnetic and electrostatic Russian Quadruplet microprobe lens system with high demagnification
A.D. Dymnikov and G. Martínez 64
Novel method of nuclear microprobe beam profile determination
C.L. Churms, V.M. Prozesky and K.A. Springhorn 70
Optimal electrostatic axisymmetric microprobe focusing system
A.D. Dymnikov and G. Martínez 74
Ion source brightness and nuclear microprobe applications
R. Szymanski and D.N. Jamieson 80

0168-583X/97/$17.00 © 1997 Elsevier Science B.V. All rights reserved

A new magnetic scanning system for proton microprobe
V. Khomenko, S. Lebed and S. Mordik 86
Field reconstruction technique for testing magnetic quadrupole lenses
S. Lebed and A. Ponomarev 90
Analysis of the fringe field region of magnetic quadrupole lenses: field measurements and ion optical calculations
G.R. Moloney, D.N. Jamieson and G.J.F. Legge 97
Numerical optimization of a short version of proton microprobe focusing system in the Institute of Nuclear Physics in Cracow
V. Brazhnik, S. Lebed, W. Kwiatek, Z. Stachura, M. Cholewa, D. Jamieson and G. Legge 104

Section III. Data acquistion and analysis

A PIXE micro-tomography experiment using MLEM algorithm
Y.K. Ng, I. Orlic, S.C. Liew, K.K. Loh, S.M. Tang, T. Osipowicz and F. Watt 109
The use of maximum entropy and Bayesian techniques in nuclear microprobe applications
V.M. Prozesky, J. Padayachee, R. Fischer, W. Von der Linden, V. Dose and C.G. Ryan 113
Iterative smoothing and deconvolution of one- and two-dimensional elemental distribution data
G.E. Coote 118
New CAMAC based data acquisition and beam control system for Lund nuclear microprobe
M. Elfman, P. Kristiansson, K. Malmqvist, J. Pallon, A. Sjöland, R. Utui and C. Yang 123
A multi-parameter system for acquisition, monitoring, and analysis of scanning ion microprobe data
P.H.A. Mutsaers and D.P.L. Simons 127
TTPIXAN — the 4th generation
I. Orlić, K.K. Loh, S.C. Liew, Y.K. Ng, J.L. Sanchez and S.M. Tang 133
The use of the maximum entropy method for the improvement of the spatial resolution of the micro-PIXE maps
E. Rokita, B. Maj, P.H.A. Mutsaers and M.J.A. de Voigt 138
Accurate quantification resulting from precise beam monitoring and calibration
A. Wallianos, P. Arndt, M. Maetz, T. Schneider and K. Traxel 144
A very simple method for true elemental mapping using the scanning proton microprobe
X. Li, J. Zhu, R. Lu, X. Wu and Y. Chen 149

Section IV. Microbeam irradiation effects

Micromachining using deep ion beam lithography
S.V. Springham, T. Osipowicz, J.L. Sanchez, L.H. Gan and F. Watt 155
Study of localised radiation damage to PIPS detectors by a scanning ion microprobe: Measured effects and the consequences for STIM analysis
D.P.L. Simons, A.J.H. Maas, P.H.A. Mutsaers and M.J.A. de Voigt 160
Ion beam induced damage in InP during heavy-ion elastic recoil detection analysis
S.R. Walker, P.N. Johnston, I.F. Bubb, W.B. Stannard, Z. Jin, D.N. Jamieson, S.P. Dooley, D.D. Cohen and N. Dytlewski 166
Use of the $\alpha \rightarrow \beta$ quartz transition to monitor the temperature increase produced by a proton microbeam
M. Mosbah, J.-P. Duraud and R. Clocchiatti 171
Molecular beam STIM imaging and post-specimen scanning with an MeV ion microprobe
A. Saint and G.J.F. Legge 176
Proton microbeam induced damages in glasses: Ca and Na distribution modification
M. Mosbah and J.-P. Duraud 182
Nuclear microscopy of single whole cultured cells: Beam damage studies
F. Watt, P.S.P. Thong, A.H.M. Tan and S.M. Tang 188

Section V. Microprobe analytical techniques

On the accuracy of element concentrations and masses of micron sized samples determined with the Heidelberg proton microprobe
P. Arndt, E.K. Jessberger, M. Maetz, D. Reimold and K. Traxel 192

Ionoluminescence technique for nuclear microprobes
J. Pallon, C. Yang, R.J. Utui, M. Elfman, K.G. Malmqvist, P. Kristiansson and K.A. Sjöland 199

3-D-micro-ERDA microscopy of trace hydrogen distributions in diamond using a 2-D-PSD with event reconstruction
B.P. Doyle, R.D. Maclear, S.H. Connell, P. Formenti, I.Z. Machi, J.E. Butler, P. Schaaff, J.P.F. Sellschop, E. Sideras-Haddad and K. Bharuth-Ram 204

In situ characterization of micron-scale particles by nuclear microscopy
A.J. Antolak, D.H. Morse, D.W. Heikkinen, M.L. Roberts and G.S. Bench 211

Improved high energy microbeam techniques
A. Kumar, A. Haberl, H. Bakhru and B. Rout 219

Nuclear models and microanalysis
B. Berthier, E. Berthoumieux, J.P. Gallien, C. Moreau and A.C. Raoux 224

Heavy ion and proton beams in high resolution imaging of a fungi spore specimen using STIM tomography
P. Formenti, M.B.H. Breese, S.H. Connell, B.P. Doyle, M.L. Drummond, I.Z. Machi, R.D. Maclear, P. Schaaff, J.P.F. Sellschop, G. Bench, E. Sideras-Haddad, A. Antolak and D. Morse 230

Depth resolution calculations for heavy-ion microbeam RBS analysis
T. Tadić, M. Jakšić, D. Dujmić and I. Bogdanović 237

High energy resolution PIXE with high efficiency using the heavy ion microbeam
Y. Mokuno, Y. Horino, A. Chayahara, A. Kinomura, N. Tsubouchi, K. Fujii, M. Terasawa, T. Sekioka and T. Mitamura 243

Detectors for microbeam applications at medium ion energy
F. Pászti, Y.K. Park and M. Takai 247

Advances in 3D ion micro-tomography
A. Sakellariou, M. Cholewa, A. Saint and G.J.F. Legge 253

Three-dimensional elastic recoil detection analysis of hydrogen in materials for use in the Yucca Mountain nuclear waste repository
E. Sideras-Haddad, D. Heikkinen, S.H. Connell, M.W. Caffee, M.L. Roberts, G.S. Bench, D. Morse, A. Meike and W. Bourcier 259

A scanning positron microscope for defect analysis in materials science
W. Triftshäuser, G. Kögel, P. Sperr, D.T. Britton, K. Uhlmann and P. Willutzki 264

Section VI. Single ions and effects

Two approaches for irradiating cells individually: a charged-particle microbeam and a soft X-ray microprobe
M. Folkard, B. Vojnovic, G. Schettino, M. Forsberg, G. Bowey, K.M. Prise, B.D. Michael, A.G. Michette and S.J. Pfauntsch 270

Design of a single ion hit facility
M. Cholewa, A. Saint, G.J.F. Legge and T. Kamiya 275

Development of high-resolution single-ion PSD using random access memories
T. Hamano, M. Takebe, T. Hirao, I. Nashiyama, T. Kamiya, T. Suda and T. Sakai 280

Accuracy of beam positioning in TIARA
T. Kamiya, T. Sakai, T. Hamano, T. Suda and T. Hirao 285

Section VII. Applications to arts and archaeology

Recent applications of nuclear microprobes to the study of art objects and archaeological artifacts
C.P. Swann 289
Scanning RBS-PIXE study of ancient artifacts from South America using a microbeam
J.L. Ruvalcaba-Sil and G. Demortier 297
Optical dot gain on newsprint determined with the Lund nuclear microprobe
P. Kristiansson, C.M. Nilsson, H. Busk, L. Malmqvist, M. Elfman, K.G. Malmqvist, J. Pallon, K.A. Sjöland, R.J. Utui and C. Yang 303
Analysis of dinosaur samples by nuclear microscopy
X. Wu, I. Orlić, S.M. Tang, Y. Wang, X. Wang and J. Zhu 308
Study of white lead paint layers by the Debrecen nuclear microprobe
I. Rajta, M.Á. Ontalba, E. Koltay and Á.Z. Kiss 315
PIXE analysis of Trojan gold jewelry
C.P. Swann, P.P. Betancourt, S. Fleming and C.R. Floyd 320

Section VIII. Applications to biology

The nuclear microprobe: An insight of applications in cell biology
Ph. Moretto and Y. Llabador 324
Botanical applications in nuclear microscopy
W.J. Przybylowicz, J. Mesjasz-Przybylowicz, V.M. Prozesky and C.A. Pineda 335
Micro-PIXE as a technique for studying nickel localization in leaves of the hyperaccumulator plant *Alyssum lesbiacum*
U. Krämer, G.W. Grime, J.A.C. Smith, C.R. Hawes and A.J.M. Baker 346
Nuclear microscopy of single whole cultured cells: preparation and analysis of human Chang liver cells
P.S.P. Thong, F. Watt, R. Paramanantham, B.H. Bay and K.H. Sit 351
Use of the nuclear microprobe at the University of Arizona for the study of heavy metal deposition in rabbit renal tissue
R.L. Keith, A.J. Gandolfi, L.C. McIntyre, Jr., M.D. Ashbaugh and Q. Fernando 358
Study of the nutrient distribution in root tips of the tropical forage Brachiaria
C.A. Pineda, P. Wenzl, J. Mayer, J. Mesjasz-Przybylowicz, W.J. Przybylowicz and V.M. Prozesky . . 362
Quantitative micro-PIXE comparison of elemental distribution in Ni-hyperaccumulating and non-accumulating genotypes of *Senecio coronatus*
J. Mesjasz-Przybyłowicz, W.J. Przybyłowicz, V.M. Prozesky and C.A. Pineda 368
Quantitative micro-PIXE mapping of squid statoliths
M.R. Lipinski, W.J. Przybylowicz, M.D. Durholtz and J. Mesjasz-Przybylowicz 374
Nuclear microprobe studies of elemental distributions in dormant seeds of *Burkea africana*
E.T.F. Witkowski, I.M. Weiersbye-Witkowski, W.J. Przybyłowicz and J. Mesjasz-Przybyłowicz. . . . 381
Elemental micro-PIXE mapping of hypersensitive lesions in *Lagenaria sphaerica* (Cucurbitaceae) resistant to *Sphaerotheca fuliginea* (powdery mildew)
I.M. Weiersbye-Witkowski, W.J. Przybylowicz, C.J. Straker and J. Mesjasz-Przybylowicz 388
Nuclear microscopy study of fish scales
S.M. Tang, I. Orlic, K.N. Yu, J.L. Sanchez, P.S.P. Thong, F. Watt and H.W. Khoo 396
Nuclear microscope analysis of blood cells from the tropical ascidian *Phallusia philippinensis*
A.N. Hogarth, P.S.P. Thong, D.J.W. Lane and F. Watt 402

Section IX. Applications to medicine

Nuclear microscopy in biomedical analysis with special emphasis on clinical metal biology
U. Lindh, P. Frisk, J. Nyström, A. Danersund, R. Hudecek, A. Lindvall and S. Thunell 406

The bioscience nuclear microscopy program at LLNL
G. Bench, S. Freeman, M. Roberts and E. Sideras-Haddad 419
Nuclear microprobe analysis of iodine and iron distributions in tumor cells exposed to the anthracycline 4'-iodo-4'-deoxydoxorubicin
R. Ortega, Ph. Moretto, Y. Llabador and M. Simonoff 426
Bone growth and bone development in the presence of implants or after induced leg-lengthening studied using the Oxford Scanning Proton Microprobe
E. Pålsgård, C. Johansson, G. Li, G.W. Grime and J.T. Triffitt 431
Nuclear microscopy study of neurofibrillary tangles in Alzheimer's disease
J. Makjanić, B. McDonald and F. Watt 439
Nuclear microprobe analysis of brain tissue: Quantitative aspects and concentration variability of minor and trace elements
S. Van Lierde, W. Maenhaut, J. De Reuck and R.D. Vis 444
Trace metal content in distinct genotypes of human neuroblastoma cells: Preliminary results
R. Ortega, B. Gouget, Ph. Moretto, C. Michelet, J. Bénard, C. Sergeant, Y. Llabador and M. Simonoff. 449
Applications of nuclear microprobe analysis to dermatological research
J. Pallon, B. Forslind, Y. Werner-Linde, C. Yang, R.J. Utui, M. Elfman, K.G. Malmqvist, P. Kristiansson and K.A. Sjöland. 454
Nuclear microscopic investigations into the elemental changes in the substantia nigra of unilaterally MPTP-lesioned Parkinsonian monkeys
P.S.P. Thong, Y. He, T. Lee and F. Watt 460

Section X. Applications to electronics and photonics

Recent applications of nuclear microprobe techniques to microelectronics
M. Takai. 466
Verification of three-dimensional charge transport simulations using ion microbeams
K.M. Horn, P.E. Dodd, M.B.H. Breese and B.L. Doyle. 470
Simultaneous imaging of upset- and latchup-sensitive regions in a static RAM
B.E. Fischer, M. Schlögl, J. Barak, E. Adler and S. Metzger. 478
Effect of ion position on single-event transient current
T. Hirao, I. Nashiyama, T. Kamiya, T. Suda, T. Sakai and T. Hamano. 486
Proton microbeam investigations on electrical properties of natural and CVD diamond
C. Manfredotti, F. Fizzotti, P. Polesello, E. Vittone, P. Rossi, G. Egeni, V. Rudello, I. Bogdanovic, M. Jaksic and V. Valkovic 491
Recent progress in JAERI single ion hit system
T. Sakai, T. Hamano, T. Suda, T. Hirao and T. Kamiya 498
Recent results in ion beam induced charge microscopy: Unconnected junction contrast and an assessment of single contact IBIC
T. Osipowicz, J.L. Sanchez, I. Orlić, F. Watt, S. Kolachina, V.K.S. Ong, D.S.H. Chan and J.C.H. Phang 503
Ion beam studies of events typical of soft errors in semiconductor memories
T. Aton, J. Seitchik, S.-H. Yang and H. Shichijo. 507
Imaging of radiation detectors properties by IBIC
I. Bogdanović, S. Fazinić, M. Jakšić, E. Vittone and C. Manfredotti 513
Spatially resolved imaging of charge collection efficiency in polycrystalline CVD diamond by the use of ion beam induced current
D.R. Beckman, A. Saint, P. Gonon, D.N. Jamieson, S. Prawer and R. Kalish. 518

Suppression of charge carrier collection in diode with retrograde well and epitaxial layers for soft-error immunity
T. Kishimoto, M. Takai, Y. Ohno, T. Nishimura, M. Inuishi, A. Kinomura, Y. Horino and K. Fujii .. 524
Study of basic mechanisms of semiconductor devices using ion beam induced charge (IBIC) collection
T. Nishijima, H. Sekiguchi, T. Hirao, I. Nashiyama, N. Nemoto, S. Matsuda and N. Shiono 528
Microanalysis of a submicron patterned WSi_x structure using a nuclear microprobe
Y.K. Park, T. Kishimoto and M. Takai 534
Performance of an acousto-optic Bragg cell under ion microbeam irradiation
A.H. Paxton, H. Schone, E.W. Taylor, S. McKinney and B.L. Doyle 539
Microbeam RBS on flat panel displays
H. Schöne, D. Walsh, R.T. McGrath, J.H. Burkhart and B.L. Doyle 543
Dislocation imaging of an InAlGaAs opto-electronic modulator using IBICC
H. Schöne, M.B.H. Breese, S.R. Lee, R.D. Briggs, S.A. Casalnuovo, B.L. Doyle, T.J. Drummond, I.J. Fritz, M.J. Hafich and G.A. Vawter 551
Research of Si and GaAs diode structures by Ion Beam Induced Charge (IBIC) collection
T. Nishijima, H. Sekiguchi, S. Matsuda and N. Shiono 557

Section XI. Applications to environmental science

Environmental applications of the LANL nuclear microprobe
D.D. Hickmott, J.M. Herrin, R. Abell, M. George, J. Stimac, E.R. Gauerke and R.F. Denniston 564
Uptake of fluoride into developing sheep teeth, following the 1995 volcanic eruption of Mt Ruapehu, New Zealand
G.E. Coote, T.W. Cutress and G.W. Suckling 571
Nuclear microprobe analysis of atmospheric aerosol samples: Comparison with bulk measurements and analyses of individual particles
W. Maenhaut, R. Salomonovic, J. Ptasinski and G.W. Grime 576
Geochemical analysis of medium sized fly ash particles using the NAC nuclear microprobe
P.D.S. Rousseau, W.J. Przybylowicz, R. Scheepers, V.M. Prozesky, C.A. Pineda, C.L. Churms and C.G. Ryan 582

Section XII. Applications to geology and planetary science

Applications of the nuclear microprobe in planetary science
R.D. Vis 587
Nuclear microprobe in geological applications: Where do we go from here?
S.H. Sie 592
Quantitative analysis of major elements in silicate minerals and glasses by micro-PIXE
J.L. Campbell, G.K. Czamanske, L. MacDonald and W.J. Teesdale 608
Study on the occurrence of platinum in Xinjie Cu–Ni sulfide deposits by a combination of SPM and NAA
X. Li, J. Zhu, R. Lu, Y. Gu, X. Wu and Y. Chen 617
The quantitative determination of H in geological materials (silicates) by elastic recoil detection analysis (ERDA)
R.J. Sweeney, V.M. Prozesky and K.A. Springhorn 623
Geochemical microanalysis of patina layers on rock artefacts from the Central Karoo and Southern Free State, South Africa
C.A. Pineda, R.T. Martin, D.K. Hallbauer, L. Jacobson, V.M. Prozesky and W.J. Przybylowicz 628
Trace element concentrations in conodonts measured by the Bochum proton microprobe
F. Bruhn, C. Korte, J. Meijer, A. Stephan and J. Veizer 636

Proton probe quantitative trace elemental microscopy of kyanite bearing eclogytic samples
S.H. Connell, R.J. Hart, P. Formenti, J.P.F. Sellschop and A. Wittenberg 641

μ-PIXE trace element analysis of crude oil
M.A. Garwan, M.S. Musazay and G.W. Grime 649

Microanalytical investigations of gold-bearing rocks from the An Najadi region in Saudi Arabia
N.I. Khandaker, M. Ahmed, M.M. Hariri, M.M. Al-Ohali, M.A. Garwan and K.R. Khan 654

Micro-PIXE analysis of carbonates and silicates: Tracking fluid flow in crustal environments
D.D. Hickmott, B.E. Treves, G.T. Roselle and L.P. Baumgartner 660

Proton-microprobe analyses of platinum-group element and gold grains
M. Maetz, B. Orberger, K. Traxel, P. Wathanakul and S. Pitragool 666

Elemental behavior during the fractionation of felsic magma at Hobenzan polymetallic province, SW Japan
S. Murao, S.H. Sie, K. Nakashima, G.F. Suter and M. Watanabe 671

Studies of progressive leaching in single mineral Pb/Pb dating
R. Frei, V.M. Prozesky and W. Przybylowicz 676

Micro-PIXE analysis of trace element concentrations of natural rubies from different locations in Myanmar
J.L. Sanchez, T. Osipowicz, S.M. Tang, T.S. Tay and T.T. Win 682

Application of nuclear microprobe in the study of granulite facies rocks from the Namama thrust belt
R.J. Utui, X. Wang, F.M. Guerreiro, M. Elfman, P. Kristiansson, K.G. Malmqvist, J. Pallon, A. Sjöland and C. Yang 687

Tracing fossil and present day fluids in rocks: application of the nuclear microprobe
M. Volfinger, C.G. Choï, C. Ramboz, M. Aïssa and M. Edon 692

Application of nuclear microprobe to the study of metasomatism in mantle peridotites
Y. Chen, J. Zhu, R. Lu, X. Wu, Y. Gu, X. Li and Q. Zhang 700

Section XIII. Applications to materials science

Recent applications of nuclear microprobe analysis to frontier materials
D.N. Jamieson 706

Nuclear microprobe study of stress-oxidation of nickel
P. Berger, G. Moulin and M. Viennot 717

The study of voids in the Au–Al thin-film system using the nuclear microprobe
H.S. de Waal, R. Pretorius, V.M. Prozesky and C.L. Churms 722

Ir and Rh silicide formation investigated by microprobe RBS
Y.K. Park, F. Pászti, M. Takai, G. Temmel, E.P. Buerte, H. Ryssel, R. Wiget, A. Kinomura, Y. Horino and K. Fujii 728

The characterisation of high-grade synthetic quartz, corundum and spinel using ionoluminescence (IL)
A.A. Bettiol, K.W. Nugent and D.N. Jamieson 734

Materials analysis at the SNL/LLNL nuclear microprobe
D.H. Morse, A.J. Antolak, G.S. Bench, D.W. Heikkinen, M.L. Roberts and E. Sideras-Haddad 740

Ionoluminescence and PIXE study of inorganic materials
C. Yang, K.G. Malmqvist, M. Elfman, P. Kristiansson, J. Pallon, A. Sjöland and R.J. Utui 746

Author index 751
